

### Step 1

Create a new flash document, take the Line Tool (N), and draw a "body" of windmill like it is shown on the picture below!

### Step 2

Double click on Layer1 to rename its name into a body. After that insert a new layer and name it head.

### Step 3

Select the head layer, take again Line Tool (N), and draw a "head" of windmill. Look at the picture below!

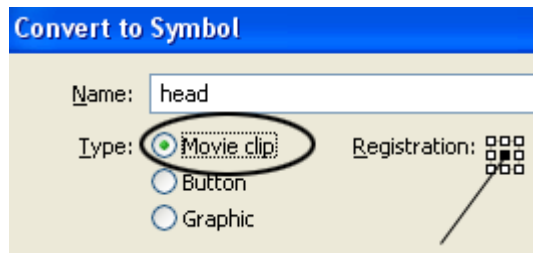

**Step 4**

Select the Paint Bucket Tool (K), and color your "windmill" whatever you like.

**Step 5**

Select the head layer and press F8 on the keyboard (Convert to Symbol) to convert the "head" of windmill into a movie clip. Look at the picture below!

### Step 6

After that, set the center point within the circle of head. Look at the picture below!

### Step 7

Click on the fifteenth frame of layer head, and press F6. After that go back on the first frame, open the Properties Panel (Ctrl+F3), and set the options from the picture below!

### Step 8

Click on the fifteenth frame of layer body, and press F5.

Test your movie (Ctrl+Enter)
